Jadavpur University Session 2024-25, Odd Semester Microprocessor Lab Paper Code: IT/S/222

## Assignment 2

\_\_\_\_\_\_

1. Write an Assembly Language Program to count the number of occurrence of 55H in a string of eight data bytes. The starting address of string is DS: 0030H. Store the count value in DS:0040H.

.model small

.stack 100h

.data

.code

main proc

mov ax, @data

mov ds, ax

mov es, ax

mov al, 55h

mov cx, 0008h

mov di, 0030h

mov bl, 00h

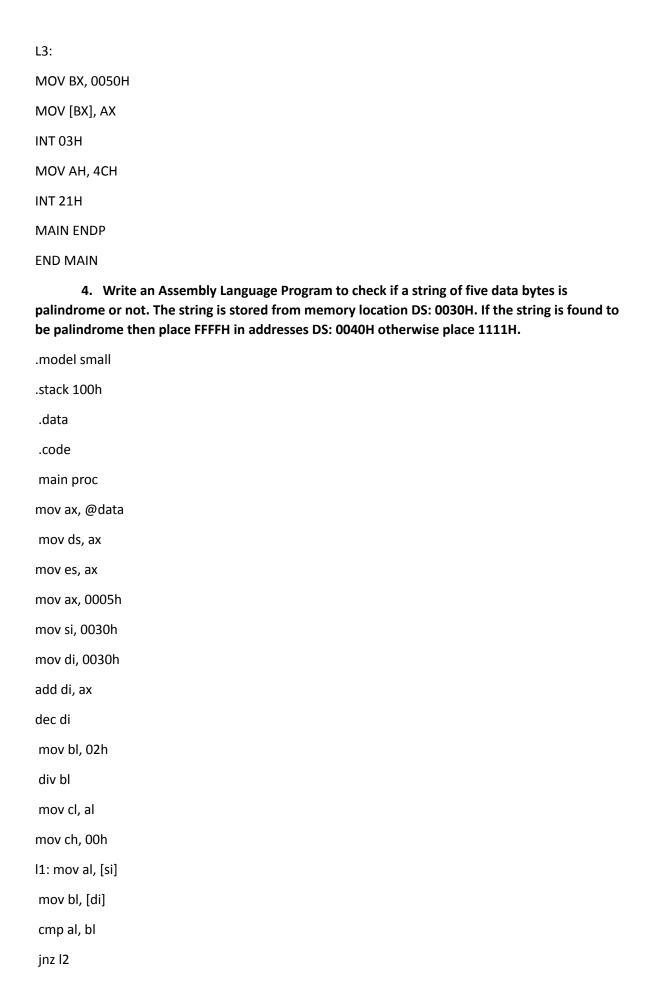

l1: scasb

jnz l2

inc bl

12:
loop l1
mov si, 0040h
mov [si], bl
int 03h
mov ah, 4ch
int 21h
main endp
end main
2. Write an Assembly Language Program to find out the location where 55H is placed in a string of eight data bytes. The starting address of string is DS: 0030H.
.model small
.stack 100h
.data
.code
main proc
mov ax, @data
mov ds, ax
mov es, ax
mov di, 0030h
mov al, 55h
mov cx, 0008h
mov si, 0040h
cld
l1:

jnz I2
dec di
mov [si], di
add si, 0002h
inc di

12:
loop I1
int 03h
mov ah, 4ch
int 21h
main endp
end main
3. Write an Assembly Language Program to compare two strings. The first string is stored from memory location DS: 0030H and the second sting is stored from DS: 0040H. Consider that the first byte of both strings contain the number of bytes contained in that string. If both strings are found equal, then show a value FFFFH in address DS: 0050H, otherwise show 1111H.
